大行（xíng），见于《左传》、《孟子》、《史记》、《管子》，意思是成大事、行大道。指农行人成大事、建伟业的胸怀，也可理解为“大行（háng）”，暗指农业银行大型银行的地位与身份。

德广，出于《庄子·外篇·天地第十二》，意为“德行圣明而又虚广”。既指农行人良好的职业素质与社会责任感、使命感，又将农业银行深厚的历史积淀和广泛的金融覆盖面同时融入其中。

大行德广 伴您成长，意指中国农业银行将以成就大业、造福于民的历史责任感和使命感，为社会、为客户提供完美卓越的服务，共同促进经济社会的和谐与进步。

The term “**Prudent Performance**” appears in a commentary by Zuo Qiuming on the *Spring and Autumn Annals*, as well as in *The Works of Mencius*, the *Historical Records* and *The Works of Guan Zhong*. It signifies the drive for great achievement and refined morality. Our ambition for excellence and great achievement at the Agricultural Bank of China (ABC, or, the “Bank”) incorporates the ethos of “Prudent Performance” in allusion to ABC’s role as a large commercial bank.

The term “**Professional Ethics**” originated in “Chapter Twelve: Heaven and Earth” from the “Outer Chapters” of the works of the philosopher Zhuang Zhou. It means “noble, wise and virtuous”, referring to noble professional qualities coupled with a high sense of social responsibility and an ambitious mission. This idea has also played a central part in ABC’s august history and business development.

The motto “**With Prudent Performance and Professional Ethics, Together We Achieve**” represents ABC’s commitment to its historical legacy and its mission to strive for great achievements and benefit the people by providing excellent services to society and individuals. Thus we invite you to join hands with us to promote economic progress and social harmony.

Message from the Chairman

The year 2011 marked the 60th anniversary of ABC. Sixty years is an important cycle in the traditional Chinese calendar and during this time ABC maintained its commitment to its state-trusted mission and upheld its responsibility as a large bank, making great contributions to China's economic and social development. The Bank has become a leading listed financial institution serving both urban and rural communities, with an extensive corporate network, both at home and overseas.

ABC has always stressed responsibility in its corporate culture. Agriculture is the great endeavor of the state and the basis of the peoples' livelihood. In July 1951, China decided to establish an agricultural cooperative bank to revive and develop the agricultural economy, ushering in a new era of development in rural banking. ABC henceforth embarked on the road to reform and development in rural areas, focusing on agriculture and serving farmers.

Throughout its 60-year history, ABC has remained faithful to its duties entrusted by state and society. Both in the age of the planned economy and in the era of the market economy, we have focused on "Serving Sannong", a term referring to the pillars of rural society: agriculture, rural areas and farmers. ABC has taken upon itself to support the economic and social development of urban and county areas with the corporate ethos of "implementing responsibilities and benefiting society". Our dedication to serving Sannong helped win the honor of "Top Ten Most Influential Enterprise Spirits in the 60 Years of New China".

ABC has always placed emphasis on responsibility in its corporate governance. In 2009, Agricultural Bank of China Limited was established with the mandate of "strengthening Sannong banking businesses, serving both urban and county areas, maximizing shareholders returns, and assisting staff development". In recent years, social responsibility has been at the top of our agenda and has been integrated throughout our corporate governance structure.

In making major strategic decisions, we promote synergistic development in urban and county areas and are committed to providing quality financial services for customers from all walks of life. At the top of our list of priorities is serving Sannong and promoting economic development in rural areas, in particular during the shareholder reform and IPO process, and exploring new ways for large commercial banks to achieve this goal. Regarding operations management, we have increased support for low-carbon finance and green loans, aiming to build an environmentally-friendly and energy-saving "Green Bank".

ABC has always held high its responsibility to drive forward development and reform. In the planned economy period, ABC took on the important task of managing the state's funds and loans, supporting rural areas and promoting their economic and social development. After the launch of China's reform and opening, ABC made the historic leap from solely supporting rural areas to serving both urban and county areas. Thanks to the efforts of several generations of ABC management, the Bank has steadily developed into a modern commercial bank focusing on Sannong, urban and rural synergy, international integration and diversified services.

In recent years, we have endeavored to empower, benefit and enrich China's farmers. We have strived to implement the state's key strategy of accelerating the "simultaneous development of industrialization, urbanization and agricultural modernization" to support agricultural industrialization and rural urbanization; expand basic financial services and extend modern financial services to every village; ease the difficulties faced by farmers in securing loans; and help boost agricultural production and increase farmers' income. By the end of 2011, the Bank's balance of agriculture-related loans had reached RMB1.6753 trillion and we had issued 98.22 million Huinong Cards, covering 300 million farmers.

Message from the Chairman

We have furthermore been fully committed to fulfilling our responsibilities as a large state-controlled bank. In support of the national economy, we provide robust backing for the execution of key national projects, we aid industrial restructuring in urban and county areas, and we vigorously promote the development of small and micro-sized enterprises (SME). At the end of 2011, ABC's loans to SMEs accounted for 53% of loans to corporate customers. In terms of the environment, we actively support the development of "green industry", "green agriculture", environmentally friendly enterprises and tertiary industry focused on recycling projects, energy conservation and environmental protection. We are reducing our carbon footprint with the roll-out of electronic systems – 62.6% of the Bank's businesses are now operated electronically. On the social front, we are leveraging our robust and extensive network to provide all-around quality services for customers in both urban and county areas. Meanwhile, 450,000 employees of the Bank have actively participated in charity initiatives, helping the poor and needy, donating money for education and actively contributing to reconstruction efforts in earthquake-stricken Wenchuan and Yushu and the landslide-hit Zhouqu. Our efforts have won widespread acclaim.

The year 2012 will play a key role in the implementation of China's 12th Five-Year Plan (2011-2015). Under the firm leadership of the CPC Central Committee and the State Council, and with the support from all corners of society, ABC will continue to enhance social responsibility and corporate governance. We will strive to better fulfill our historic mandate as a large state-controlled bank and will endeavor to contribute more to economic and social development in urban and county areas.

We advocate green offices and environmentally-friendly procurement strategies, and have moved towards paperless offices in a bid to cut carbon emissions and consumption of resources.

Jointly Improving Social Harmony

ABC makes social contributions through practical actions, endeavoring to enhance harmony in all social sectors and make constant improvements in customer satisfaction. In 2011 we launched the "Service Quality Upgrading Year" program to further the transformation of our business outlets and establish standardized service platforms to ensure constant improvements in customer satisfaction. We began to build a next-generation customer service system to improve our efficiency in handling customers' enquiries and complaints. In 2011, the Bank made donations totaling RMB25.72 million. ABC moreover strived to ensure the welfare of staff and provided them with career development opportunities. We made efforts to mobilize initiative, enthusiasm and creativity among our 450,000 employees, promote democratic internal management structures, and fully guarantee their legal rights and interests. In 2011, we trained nearly 5,000 senior executives, 35,000 professionals and 680,000 grassroots staff.

The year 2012 marks a brand new start for ABC. We will cleave to the concept of scientific development, consciously infuse a sense of social responsibility into all aspects of our operations management, earnestly fulfill our social duties as a large state-controlled bank, and exert ourselves to promote sustainable development of the economy, society and the environment.

专题 60年历程

1951年7月10日，中华人民共和国政务院正式批复成立农业合作银行，由此拉开了新中国第一家专业银行的序幕。2011年7月10日，中国农业银行迎来了60周年华诞。60年来，农业银行与新中国建设及改革发展紧密联系在一起，为繁荣农村金融事业和构建现代金融体系做出了重要贡献。在服务城乡经济社会的过程中，农业银行发展成为一家联通城乡、覆盖全国、辐射全球的大型上市银行。

计划经济时期 (1951-1978)

发挥金融支农的主渠道作用

农业银行经历了“三分三合”，始终履行国家赋予的神圣职责，成为稳固和发展新中国农村经济金融事业的重要力量。1951年，新成立的农业合作银行有力支援和促进了农村经济和农业互助合作运动。1955年，农业银行的主要职能定位于发放各项支农贷款，组织整顿农村信用社，办理农业生产合作社的会计辅导工作，对支持农业生产、限制和消灭农村高利贷起了重要作用。1963年，农业银行作为国务院的直属机构，担负起统一管理国家农业资金和贷款的任务，有力地支持了农业生产的大发展。

专业化银行时期 (1979-1993)

重点支持农村和县域商品经济大发展

1979年2月，农业银行恢复成立，从此进入了无间隙快速发展轨道。1980年，提出了“因地制宜地支持商品生产，讲求经济效益，活跃农村经济”的发展方针。改革开放初，大力支持农业资源开发和技术改造、国家商品粮、棉、糖生产基地建设、粮棉转化转产，为农村和农业基础建设等方面做出了突出贡献。到80年代中期，全行贷款98%以上投向了农村。1985-1990年，全行向外向型乡镇企业投放贷款达到600亿元，是“六五”期间的5倍，一大批中小民营企业在农行的支持下迅速成长为大型骨干企业。

商业化转型时期 (1994-2006)

加快推进体制改革和城乡并举的服务格局

1993年12月，国务院颁发了《关于金融体制改革的决定》，提出把专业银行办成真正的国有商业银行。一方面，农业银行加快发展城市金融业务，提出了“效益兴行”和“双优战略”等重大举措，打破行业、区域和所有制界限，把有生命力的优势产业、优良客户作为支持重点，城乡并举的服务格局初步形成。另一方面，服从国家金融体制改革和国有企业改革的需要，积极推进体制转型，经历了“一分一脱一剥”的重大改革。1994年，农业银行向农业发展银行划转政策性业务。1996年，根据国务院对农村信用社管理体制改革的规定，实施了“行社脱钩”。2000年7月，农业银行向长城资产管理公司剥离不良资产。经过商业化改造，农业银行的不良贷款率大幅下降，资本充足率显著提升，各项业务呈现快速发展势头，1994-2006年，全行各项存款和贷款分别增长了5.96倍和4.52倍，为股份制改革和可持续发展奠定了坚实的基础。

股改上市时期 (2007至今)

探索城乡联动独具特色的改革发展道路

2007年全国金融工作会议，确立了农业银行“面向三农、整体改制、商业运作、择机上市”的十六字股改方针。如何处理好服务“三农”与商业运作的关系，是农业银行股改中面临的最大挑战。为此，农业银行专门组建了三农金融部，把位于县域地区的支行全部纳入其中，搭建组织架构、厘清业务边界、下沉信贷经营重心、实行业绩单独核算、完善激励考核机制，充分调动各级行服务“三农”的积极性。这一举措是农业银行解决服务“三农”问题的一个创举，也是中国金融发展过程中的一大创新。同时，开展以惠农卡为核心的产品创新和以电子化为突破口的渠道创新，推出了300多种“三农”金融产品，加大ATM机、POS机、转账电话等自助机具在农村地区投放力度，提高了“三农”金融服务覆盖面。

与此同时，农业银行紧紧抓住县域城镇化、产业梯度转移和消费升级等商业机遇，推动城市和“三农”业务统筹发展。在资源配置、计价考核、产品开发、系统营销等方面出台政策措施，完善联动发展的正向激励机制。针对跨越城乡的“龙型”项目、集团客户等，加强城乡协作联动和提升服务效率。通过机制建设和政策引导，初步构建起城乡业务互补、互促、互动的经营格局。农业银行“城乡联动+高速成长”的投资故事得到了境内外投资者的高度认可，2010年7月15日、16日，农业银行在上海和香港两地成功实现A+H股公开上市。

通过股改上市，农业银行的体制机制发生了脱胎换骨的变化，构建起独立运作、密切配合、相互制衡、有效监督的现代商业银行公司治理结构，建立和完善了资本与风险相匹配的现代商业银行管理机制，管理水平和盈利能力不断提升。

Special Theme: 60 Years of Development

ABC celebrated its 60th anniversary on July 10, 2011. Established as Agricultural Cooperative Bank in 1951, ABC was the first specialized bank of the People's Republic of China (PRC). In its 60-year history, the Bank played a leading role in the establishment, reform and development of the PRC, making significant contributions to rural business development and the implementation of a modern financial system. Serving both urban and rural communities, the Bank has become a leading listed financial institution with an extensive corporate network, both at home and overseas.

Specialized banking (1979-1993)

Supporting the development of rural commodity markets

In February 1979, ABC was restructured and began a new stage of rapid development. In 1980, the Bank committed itself to "supporting commodity production in line with local conditions, valuing economic benefits, and enlivening the rural economy." In the early reform and opening period, the Bank provided key support for the development of agricultural resources and farming technology, as well as helping establish key national production bases along with processing and refining facilities for grain, cotton and sugar – major contributions to the development of rural and agricultural infrastructure. In the mid-1980s, more than 98% of the Bank's loans flowed into rural areas, while from 1985 to 1990 it lent export-oriented township enterprises as much as RMB60 billion – five times the total loan issuances during the 6th Five-Year Plan period (1981-1985). ABC has helped numerous private SMEs grow into cornerstone enterprises.

The planned economy (1951-1978)

Developing financial services as the main channel to support farming

ABC has maintained its commitment to progress through three corporate restructurings, playing a key role in the development of the PRC's rural economy and financial system. From its founding in 1951, the Agricultural Cooperative Bank supported and promoted the rural economy in line with the agricultural mutual aid and cooperation movement. ABC meanwhile was established in 1955 with the mandate of issuing agricultural loans, organizing and managing rural credit cooperatives, and providing accounting services for farming cooperatives. The Bank has played a major part in supporting agricultural production and eliminating rural usury. As an institution directly controlled by the State Council, ABC in 1963 took over the central management of state agricultural funds and loans, helping facilitate the healthy development of the industry.

Special Theme: 60 Years of Development

Commercial transformation (1994-2006)

Stepping up financial reform while pursuing simultaneous urban and rural development

In December 1993, the State Council launched a landmark campaign to transform China's specialized banks into state-owned, commercially-oriented institutions. ABC played a leading role in the initiative, proposing key measures to accelerate the development of urban financial systems – including "developing the Bank on benefits" and "double-excellence strategy". The Bank helped overcome regional and structural barriers to development, reorienting the industry towards competition and customer service and fostering the strategy of simultaneous urban and rural development. In order to further financial reform and the restructuring of state-owned enterprises, ABC moreover implemented reforms designed to separate policy-related banking from commercial services. It transferred its policy-related responsibilities to Agricultural Development Bank of China in 1994, then in 1996 severed administrative relations with rural credit cooperatives in accordance with the Regulations of the State Council on the Reform of Management System of Rural Credit Cooperatives. And in July 2000, the Bank transferred its non-performing assets to China Great Wall Asset Management Corporation, significantly reducing its non-performing loan ratio and boosting its capital adequacy ratio, as well as spurring on rapid development in a range of business areas. From 1994 to 2006, ABC's deposits increased by 5.96 times while loans rose by 4.52 times, laying a sound foundation for corporate restructuring and sustainable development.

Joint stock reform and IPO (2007-present)

Exploring reform and development models to achieve urban-rural synergy

At the National Financial Conference in 2007, it was proposed that ABC should focus on Sannong – agriculture, rural areas and peasants – as well as undertake a corporate restructuring, adopt a commercial business model, and go public at a suitable time. Balancing its mandate between serving Sannong and adopting a commercial model was ABC's greatest challenge in achieving a joint stock structure. ABC accordingly set up an ad hoc County Area Banking Business Department incorporating all county-level branches, strengthened its organizational structure, reoriented its business focus, introduced independent audits, improved incentive and evaluation mechanisms, and mobilized human resources at various levels to strengthen its Sannong banking business. Meanwhile, the Bank conducted an innovation and technology program under the Farmer's Benefit Card system, launched more than 300 Sannong financial products and increased the number of ATMs, points of service (POS), transfer telephones and other self-service apparatus in rural areas so as to expand service coverage.

ABC furthermore exploited commercial opportunities offered by county-level urbanization, industrial restructuring and consumer development to promote the integrated development of its urban and Sannong-focused businesses. The Bank rolled out measures covering resource allocation, valuation assessment, product development and system marketing, among others, which were intended to incentivize integrated development. It strengthened cooperation and synergy between urban and county areas and improved service efficiencies for key projects and group customers. Such mechanisms helped create a business model characterized by mutually supportive interaction between urban and rural businesses. Based on urban-rural synergy and rapid growth, ABC's development strategy garnered interest from both domestic and overseas investors, and in July 2010 the Bank completed public listings in Shanghai and Hong Kong.

ABC's reorganization brought about substantive changes and paved the way for a system of corporate governance characterized by independent operation, close cooperation, a balanced focus and effective supervision. The Bank has implemented and refined its risk management mechanisms and continues to make improvements in management structure and profitability.

Improvements have been made to the organizational framework for risk management. The Credit Approval Department was established and functions of the Credit Management Department optimized. The Asset Disposal Department was renamed the Special Assets Operation Department so as to enhance the operating value of non-performing assets.

Administrative Measures for Industry Credit Risk Limits and Administrative Measures of Agricultural Bank of China for Country Risks were promulgated; monitoring guidelines on key risks for grassroots institutions were optimized; and sound policies and systems were established.

We enhanced risk management and control in key areas such as local government financing platforms and real estate loans; raised access standards; centralized the approval process; and implemented quota management. We limited the issue of loans to industries with high energy consumption, high pollution and overcapacity, and adjusted credit resource allocation according to national regional and industrial development strategies.

The Bank accelerated the implementation of the New Basel Capital Accord, launched a non-retail internal rating system, completed pilot testing of a retail-level rating system, and endeavored to develop advanced risk management tools and strengthen sound business operations.

"In the past it cost more than RMB10 and took more than an hour to withdraw my pension in town. It was even more inconvenient for those of our age. Now I can walk for less than five minutes to get it," said 67-year-old Hu Lazhen from Zhoufang Village, Honghu City, Hubei, speaking of the advantages of the Bank's service stations for the new rural pension and insurance schemes. In Zhoufang Village, more than 480 villagers like Hu Lazhen can now claim their pensions near their homes.

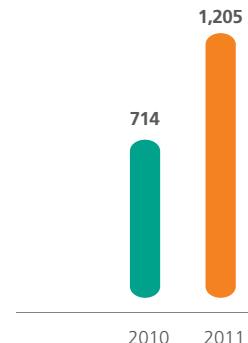

Jilin Branch launched direct subsidized guaranteed loans for farmers

Every year, Jilin Province distributes direct subsidies for grain and farming materials worth nearly RMB7 billion. Jilin Branch accordingly developed a "comprehensive direct subsidized guaranteed loan" product and offered loans of RMB1.179 billion to some 98,700 farmers in 2011. After receiving a direct subsidized guaranteed loan of RMB73,000, Song Haibin, a villager from Qili Township of Shulan City, said "I did not expect that I could apply for a loan secured by the government's direct financial subsidies. I am now able to contract out 15 shang (about 150,000 m²) of paddy fields, which will bring me at least RMB100,000 in profits a year."

Independent Assurance Report

To the Board of Directors of Agricultural Bank of China Limited (the "Board of Directors"):

We have been engaged by the Board of Directors of Agricultural Bank of China Limited ("ABC") to perform a limited assurance engagement over key social responsibility indicators (the "Key Social Responsibility Indicators") included in the Corporate Social Responsibility Report for the financial period from 1 January 2011 and 31 December 2011 (the "Report"). We also evaluated ABC's compliance with the principles of materiality and inclusivity as set out in Global Reporting Initiative (the "GRI") G3.1 Sustainability Reporting Guidelines.

Responsibilities of the Board of Directors

The Board of Directors is responsible for the compilation and presentation (including reporting guidelines, limitations, reporting data and relevant identification procedures) of the Report in accordance with the GRI G3.1 Sustainability Reporting Guidelines, and the recommendations of the relevant disclosure guidelines issued by Shanghai Stock Exchange.

The Board of Directors is also responsible for the determination of social responsibility indicators and reporting objectives, as well as identifying stakeholders and the material issues relevant to them, establishing and maintaining systems of internal controls for the management of social responsibility performance, how the reported performance data is derived, and maintaining adequate records.

Our Responsibilities

In accordance with our agreed terms of engagement with ABC, it is our responsibility to express a conclusion on the Key Social Responsibility Indicators (see "Key Performance Indicator Table" included on Page 27 of the Report) and ABC's compliance with the principles of materiality and inclusivity set out in the GRI G3.1 Sustainability Reporting Guidelines, based on our work performed; and to report our conclusion solely to the Board of Directors, and for no other purpose. We do not assume responsibility towards or accept liability to any third parties for the contents of this Independent Assurance Report.

Basis of Our Work

We conducted our work in accordance with *International Standard on Assurance Engagements 3000: "Assurance Engagements Other Than Audits or Reviews of Historical Financial Information"* issued by the International Federation of Accountants. We planned and performed our work so as to obtain all the information and explanations that we considered necessary in order to provide us with sufficient evidence to form our conclusions below.

Our procedures performed included interviewing with ABC's personnel responsible for collecting, compiling and reporting the information, analyzing the information obtained, and other procedures relevant to the collection of the appropriate audit evidence. Specifically we:

- interviewed ABC's management and personnel responsible for collecting, preparing and disclosing information to understand the current procedures for identifying stakeholders, the material issues relevant to them, and the relevant controls over the compilation of the Report;
- performed enquiries and inspected related supporting documents to understand the expectations and needs of the stakeholders and how ABC responded to these expectations and needs;
- confirmed the Key Social Responsibility Indicators disclosed in the Report and the relevant assessment criteria with ABC's management;
- tested, on a sample basis, the consistency of the Key Social Responsibility Indicators with the findings of our work and the relevant internal controls over the compilation of the Report.

Independent Assurance Report

Limitations of Our Work

Our limited assurance work focused only on the Key Social Responsibility Indicators disclosed in the Report and ABC's compliance with the principles of materiality and inclusivity set out in the GRI G3.1 Sustainability Reporting Guidelines. We gathered evidence and confirmed its accuracy to support our limited assurance conclusion. In a limited assurance engagement, the evidence gathering procedures are less in scope than a reasonable assurance engagement. Accordingly, we do not express an opinion on the effectiveness of any of the ABC's application systems, business processes, and the related financial performance data.

We performed our limited assurance engagement over the internal controls and procedures at and information provided by the head office of ABC. Our work does not include the evaluation of the information and procedures at branches and subsidiaries of ABC nor involve interviewing with external stakeholders. Moreover, historical comparative data is not within the scope of our work.

Meanwhile, our work does not include an evaluation of other information disclosed in the Report other than the Key Social Responsibility Indicators (see "Key Performance Indicator Table" on Page 27 of the Report).

Our Conclusions

- Subject to the limitation of our work, and the work performed and described in the Independent Assurance Report, nothing has come to our attention that causes us to believe that there were any errors that would have a material impact on the Key Social Responsibility Indicators disclosed in the Report; and
- Subject to the limitation of our work, and the work performed and described in the Independent Assurance Report, nothing has come to our attention that causes us to believe that the Report was not prepared in compliance with the principles of materiality and inclusivity as set out in GRI G3.1 Sustainability Reporting Guidelines.

Other Observations

We had the following other observations which do not form part of the aforementioned conclusions and on which we will not express any assurance nor opinion:

- ABC has defined stakeholders and communicated to understand their expectation, identified material issues with the consideration of the effect of stakeholders' decision and business operation, and given positive responses to stakeholders. We propose that ABC may strengthen the identification and participation of stakeholders, and establish more perfect standard and procedure to identify material issues of social responsibility, which would help improve social responsibility management continuously.
- ABC has established a comprehensive reporting process to collect relevant information which could contribute to effective disclosure for social responsibility regarding of economy and social and environment. We propose that ABC may improve statistical definition and standard of indicators for social responsibility performance, and optimize the process of social responsibility report, review and collection to demonstrate more quantified social responsibility performance.

Restriction on Use

This Independent Assurance Report is intended solely for the use by the Board of Directors and is not suitable for any other purpose.
